实习经历

|| 武汉金银湖实验室

Question: Tell us about your research internship.

请介绍你的科研实习经历。

✨ At Wuhan Jinyinhu Laboratory, I worked on a software supply-chain security platform and an LLM application. I built over fifteen ECharts charts, such as a threat map, a CVE trend chart, and a high-risk list. I also made a three-step GeoJSON backup plan and API backup handling for weak network conditions. In TcodeAI, I helped write clear repair advice for software problems and reused the same chart design on more than three pages. I learned to care about system stability, easy maintenance, and user needs when adding AI to a real product.

在武汉金银湖实验室，我参与了软件供应链安全平台和大语言模型应用的开发。我制作了 15 个以上的 ECharts 图表，例如威胁地图、CVE 趋势图和高风险列表。我还针对网络不稳定设计了三级 GeoJSON 备用方案和接口备用处理。在 TcodeAI 中，我帮助编写清晰的软件问题修复建议，并将相同的图表设计复用到三个以上的页面。这段经历让我认识到，把 AI 加入真实产品时，要关注系统稳定性、维护方便和用户需求。

|| 东软医疗

Question: What did you learn from the Neusoft internship?

你从东软实习中学到了什么？

✨ At Neusoft Medical, I worked on the web and mini-program parts of a hospital system. I helped with image collection, image processing, AI API connection, face-login, and an AI customer-service feature. I learned to work with teammates, follow existing APIs, and finish tasks under real business limits.

在东软医疗，我参与了医院系统的网页端和小程序端开发。我负责图像采集、图像处理、AI 接口连接、人脸登录和 AI 客服功能。我学会了与队友合作、遵循已有接口，并在真实业务限制下完成任务。
